Thanks – sorry I didn't get my comment to you in time to avoid you having to re-do it. Making an assertion like that could really bite us in the future.

I deleted 2a and resigned - I think it's important that we all agree with what we are all saying in this joint letter.

One thing – I don't agree with ADEQ's 2a assertion that hydraulic control has not been maintained throughout SEE and that LNAPL mass has been moved beyond its original location. Dissolved phase mass, yes, but not LNAPL. I think 2a should be deleted.

Wayne

I've merged Dan's comments in with yours, I think this is the final version. The pdf version has my signature, and ready for yours but word version included in case you have final edits. You can send after you sign or send back to me to send out. Great job everyone – I think that's the fastest letter we've ever done!

Carolyn; eva – letter modification incorporating ADEQ points. Note the pdf figure has a slight well placement location modification.

Steve, Bo – Figure 3 was a nice touch and illustrative, but was omitted to save space and to prevent any final run format issues (the dotted circle was not linked and kept moving – my bad). Thanks for your input.

I tried to keep everybody's emphasis and intent.
